

FAC Coc list or a products page 3**GOVERNMENT OF THE RUSSIAN FEDERATION****DECISION of June 25, 2009 No. 532****List of a product which require Russian FAC certification /list f a products for Russian Federal agency of communication certification/ FAC list of a products /FAC declaration list/FAC certification list**

List of change documents

(in Decree of the Government of the Russian Federation of 28.01.2015 N 64)

In accordance with [Article 41 of the](#) Federal Law "On Communications", the Government of the Russian Federation decides:

1. To approve the attached list of communication facilities subject to compulsory certification.

2. To establish that:

a) the means of communication indicated in the list , approved by this Decree, are subject to obligatory certification if such means of communication are used:

in the public communication network;

part of the technological communication network attached to the public communication network;

in special purpose communication networks for interfacing communication networks of special

appointment with the public communication network;

b) communication facilities subject to mandatory certification are not included in the lists

products subject to the provisions of paragraph

first paragraph 1 of Article 29 of the Federal Law "On Technical Regulation";

c) means of communication in respect of which the conditions for the application of certificates of conformity, issued before the entry into force of this Decree,

quality: international switching centers, may be used as international telephone exchanges;

transit intercity nodes of automatic switching, it is allowed to use ,the quality of long-distance telephone exchanges;

long-distance telephone exchanges, may be used as zonal

telephone exchanges;

urban automatic telephone exchanges, subscriber digital hubs,

rural automatic telephone exchanges, can be used as local

telephone exchanges;

channel-forming equipment of plesiochronous digital hierarchy, equipment

temporary multiplexing plesiochronous digital hierarchy, equipment cross switching plesiochronous digital hierarchy, terminal and intermediate points of linear path plesiochronous digital hierarchy, it is allowed to use as equipment digital transmission systems plesiochronous digital hierarchy; control equipment and monitoring of radio relay communication systems, is allowed use as an equipment of automated control and monitoring systems telecommunication networks; analog-digital radio relay communication systems, digital radio relay communication systems synchronous digital hierarchy, digital radio relay communication systems plesiochronous digital hierarchy, analog radio-relay communication systems, can be used in quality of radio relay communication equipment.

3. Certificates of conformity issued by means of communication before the entry into force of this Resolutions apply until the expiry date of such certificates.

4. Recognize as invalid Decree of the Government of the Russian Federation of 31 December 2004 N 896 "On approval of the list of communication facilities subject to compulsory

certification "(Collected Legislation of the Russian Federation, 2005, No. 2, Article 155).

Chairman of the Government

Russian Federation

VLADIMIR PUTIN

Approved by

Decree of the Government

Russian Federation

of June 25, 2009 No. 532

List of a product which requires Russia radio certification /List of a products which are subject to a conformity assessment in form of Certification of federal agency of communication Russia/

[FAC list or a product for FAC certificate](#)

(Decree of the Government of the Russian Federation of 28.01.2015 N 64)

I. Communication facilities that perform the functions of switching systems

1. Equipment that is part of transit, terminal-transit and terminal nodes

fixed telephone communication network:

- a) international telephone exchanges;
 - b) long-distance telephone exchanges;
 - c) zone telephone exchanges;
 - d) local telephone exchanges;
 - e) combined telephone exchanges.
2. Establishment-production automatic telephone exchanges.
 3. Equipment that implements the functions of switching and service management.
 4. Equipment for the provision of intra-zone, long-distance and international telephone communication with the help of an operator.
 5. Equipment of emergency call service call centers.
 6. Equipment of Call Center Call Centers service.
 - 6 (1). The equipment of the centers of processing of calls of emergency operational services.
(item 6 (1) is introduced Decree of the Government of the Russian Federation of 28.01.2015 N 64)
 7. Telegraph communication equipment:
 - a) telegraph stations and substations;
 - b) message switching centers.
 8. Equipment for switching networks of mobile radiotelephone communications.
 9. Equipment for switching mobile radio networks.
 10. Equipment for switching networks of mobile satellite radio communication.
- II. Communication facilities performing functions digital transport systems
11. Equipment for switching and routing information packet networks data.
 12. Equipment of digital transmission systems of a synchronous digital hierarchy.
 13. Equipment of digital transmission systems of the plesiochronous digital hierarchy.
 14. Equipment of the linear tract of communication lines.
 15. Equipment with asynchronous information transfer mode.
 16. Equipment of digital television and audio broadcasting systems.
 17. Hardware clock network synchronization.
- III. Communication facilities performing functions control and monitoring systems
18. Equipment of automated systems of control and monitoring of networks telecommunications.
- IV. Equipment used to account for volume rendered communication services in public communication networks

19. Automated calculation systems.

20. Equipment for time-based accounting of the duration of the connection.

V. Radio-electronic means of communication

21. Earth stations of satellite communication and broadcasting.

22. Radio relay communication equipment.

23. Base stations and repeaters of mobile radiotelephone communications networks.

24. Base stations and repeaters of mobile radio networks.

25. Equipment for television broadcasting and broadcasting.

26. Base stations and repeaters of radio access networks.

VI. Communication equipment,

including software that provides

implementation of specified actions in carrying out

operational-search activities

27. Equipment of switching systems, including software,

ensuring the implementation of specified actions in the conduct of operational search activities.

28. The equipment of digital transport systems, including software,

ensuring the implementation of specified actions in the conduct of operational-search activities.

29. Hardware and software of information systems containing databases

data of subscribers of the communication operator and the communication services provided to them, providing

the implementation of specified actions in the conduct of operational-search activities.

VII. Terminal equipment that may cause to disruption of the communication network

common use <*>

<*> Items can be entered additionally when the specified equipment appears.
